Method-1 calculation of packet_loss rate using data_seg_out from ss and retrans from ss data

Method-2: calculation of packet_loss rate using data_seg_out from ss and retrans from iperf3 da

3: calculation of packet_loss rate using data_seg_out from ss and cwnd from i

Method-4: calculation of packet_loss rate using packet drop rate at the router

- actual values
- predicted_values
- fit

y=bandwidth(bits/sec)

x=mss/rtt*sqrt(packet_loss_rate)
